**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 06 November 2002.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## DETAILED ACTION

### *Continued Examination Under 37 CFR 1.114*

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on November 06, 2002 has been entered.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 11-13 are rejected under 35 U.S.C. 102(e) as being anticipated by Eyer et al (US 6,160,545 A).

Regarding claim 11, Eyer discloses a system (100) comprising a packetization device (MPEG-2 encoder) independently packetize at least two heterogeneous video streams (video and IPG are packetized by the MPEG-2 encoder) for transmission thereof in respective native information formats and associated native frame rates (video and IPG data are from the separated sources. The MPEG-2<sup>encoder</sup> packetizes independently video and IPG data at their native rates, particularly, IPG data flow at 20-220kbps to a MPEG-2 encoder) (see col. 8, lines 35-45, 12-17 and figures 1-3). It is noted that the encoder inherently comprises a processor, a memory coupled to the processor and a video controller coupled to the processor.

Regarding claim 12, Eyer discloses the system including a modulation device (mux/mod 250) to modulate and transport the independently packetized streams (see figure 2 and col. 24-27).

Regarding claim 13, Eyer discloses that each of the video streams has a different frame rate (for instance, IPG data flow at 20-220kbps to a MPEG-2 encoder) and is packetized to be de-packetized at the original frame rate (via display generator 190) in a display device (195) (see col. 8, lines 35-42 and figure 3).

### ***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Tiernan et al (US 6,172,988 B1) discloses a method for transmission of digital signals in systems containing video, audio signals conforming to packet-based multiplexed communication standards. Settle et al (US 6,233,253 B1) discloses a digital signal conversion method of data from different input sources and different input formats to form a digital bitstream for output in a selected output format.
